Colored head trolling models for offshore and inshore fishing

Trolling lures for offshore and inshore fishing, these lures has given excellent results, the main characteristic of our lure is the high velocity of trolling the lures can hold, the bigger models can hold log speeds up to 9 knots..

Mod.	weight g.	treble hook
6	12,5	1
8	17	2
10	26	2
12	30	2
14	40	2
16	46	2
18	70	2
20	85	2

The three tuning possibilities allow the fisherman to decide how the lure swim and wobbles in the water and at which depth it will fish changing trolling speed to fish different depths; very sensible on the rod tip, lots of vibrations, very shining in the water and will attracts fish even at great distances.

Available colors

clear - red - pink - black - blue - grey - green - yellow

Head less models for Spin-fishing

Mod.	weight g.	treble hook
4	3	1
5	5	1
6	10	1
7	15	1

mod.	weight gr.
3	3
2,5	2,25
2	1,5

LUCIAPUMA lures are made of AISI 316 steel, salt water proof. However we suggest to wash in freshwater after saltwater fishing. Equipped with VMC treble hooks. Forged split rings are pre shaped for fast assembling.

Important: Luciapuma lures can be easily repaired, reshaped or tuned using a plier or even with bare hands. To disassemble all the parts remove the steel split ring first and then the plastic head. Then You can proceed with the main steel parts disassembling.

To perfectly tune the lure is better to fold the rear side of the lateral flaps (see picture 2). If (for example) it swim heading to the left fold down the rear part of the right flap.

LUCIAPUMA Spinning Lures ***The lure that swims the way you want !!!***

photo 1

Photo 1 -Folding the rear flaps in this way you'll have lots of vibrations. Suggested for surface fishing or trolling 2,5 - 4 Knots.

photo 2

Photo 2 - Less vibrations and more wobbling, to fish deeper or for trolling 2-3 knots.

photo 3

Photo 3 - Less vibrations and wobbling, deep water fishing, suggested for trolling 1,5 - 2 knots

photo 4

Photo 4 – Also the plastic head models can be used and tuned in the same way for slow speed trolling or spin-fishing.
